

**CITY OF CARLSBAD
CLASS SPECIFICATION**

JOB TITLE: **ENVIRONMENTAL SPECIALIST I/II**

DEPARTMENT: **PUBLIC WORKS**

BASIC FUNCTION:

Under general supervision, to perform education and outreach activities, field investigation and inspection on industrial, commercial, and residential dischargers of storm water to enforce and ensure compliance with storm water and environmental protection, vehicle abatement, health and safety codes and other related ordinances; to perform related work as required.

DISTINGUISHING CHARACTERISTICS:

The Environmental Specialist I is the entry training level in the Environmental Specialist series. Incumbents work under the direction of the Environmental Specialist II or the Environmental Programs Manager, performing the routine permitting, education and outreach efforts, inspections and code enforcement activities, or assisting in inspection and compliance activities with a more experienced inspector. Work is reviewed in progress and/or upon completion for accuracy and completeness. Advancement to Environmental Specialist II occurs when training is completed, and the incumbent has acquired the requisite knowledge and abilities necessary to effectively perform the full range of field investigations, inspections, and code enforcement work.

The Environmental Specialist II is the journey level in the environmental specialist series. The primary responsibility of the Environmental Specialist II is to plan and organize inspections, investigations and related activities of the Storm Water Protection Program. Incumbents at this level are expected to work independently and schedule their work within required timeframes to meet the objectives of the program. They handle the most difficult and sensitive issues related to violations, court actions and the full range of activities such as education, outreach, inspection and code enforcement associated with the storm water and environmental protection program. Incumbents will also provide guidance and training to entry and field staff in the course of their duties.

KEY RESPONSIBILITIES:

Plan, organize and participate in the permitting, monitoring, inspection, enforcement, pollution prevention, and data management activities of the Storm Water Protection Program and other related environmental programs in accordance with federal, state and local laws and National Pollutant Discharge Elimination System (NPDES) permit(s).

Coordinate the investigation of storm water run-off, industrial related storm water quality problems, complaints and violations of storm water regulations and codes.

Prepare outreach materials, conduct outreach efforts and train city staff on storm water and environmental protection. Provide information to property and business owners, tenants, city employees, and the general public through individual contact in the field, over the counter, at workshops or community events, and by telephone or other appropriate means.

Review building plans for construction and/or issue storm water discharge permits, to identify storm water discharge sources and best management practices (structural and non-structural) to maximize storm water and water quality protection.

Prepare notices of violation, compliance schedules in cooperation with violators, cases for court action, and appear in court to testify in such action; prepare and maintain records of investigations made and actions taken; maintain inspection files, records, and logs; write reports and chronologies.

Review and determine completeness of Storm Water Pollution Prevention Plans and Best Management Practices to maximize storm water and environmental protection.

Coordinate actions with other city, county, and state departments in educating citizens, inspections, and enforcement of code violations when so directed.

Perform sampling and basic field testing of storm water, wastewater and other environmental samples; determine pollutants and further need for lab testing.

Evaluate and interpret technical reports, documents, manifests, applications and permits related to environmental regulations and compliance with local, state and federal regulations.

Perform other related duties as assigned.

Environmental Specialist II:

Assist in the development and implementation of policies, procedures and other program requirements for education, inspection and compliance monitoring.

Schedule work activities and inspections independently to meet program objectives in a timely manner.

Prepare and write compliance reports and associated correspondence to regulatory agencies.

Provide training, direction and guidance for the Environmental Specialist I and other field staff related to carrying out the course of work.

Conduct and represent the City at meetings and make presentations to public interest groups, City personnel and others as directed.

Keep current with federal, state and local regulations and their impacts on the City's storm water and environmental quality and protection.

QUALIFICATIONS:

To perform a job in this classification, an individual must be able to perform the essential duties as generally described in the specification. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential duties in a specific job. The requirements listed below are representative of the knowledge, skill and/or ability required.

Knowledge of:

Environmental Specialist I:

Basic understanding of principles and practices of chemistry, biology, microbiology related to work.

Environmental Specialist II:

Modern principles and practices of chemistry, biology, microbiology, or environmental protection applicable to storm water, wastewater, hazardous materials or waste, or industrial wastes.

Laws and ordinances pertaining to storm water and environmental protection.

Basic principles and practices of municipal storm water and sewer systems, environmental protection, health and safety, industrial and hazardous materials and wastes, or water quality.

Basic principles of inspection, investigation or code enforcement.

Methods of detection of pollutants in storm water runoff, or other wastes and their effect on storm water and environmental protection.

Proper use of monitoring, sampling, and basic testing equipment.

Ability to:

Environmental Specialist I:

Learn applicable laws, ordinances, regulations, and policies; learn to apply procedures, techniques, and interpret and make decisions related to job duties. Deal with the public tactfully and effectively.

Establish and maintain cooperative relations with those contacted in the course of work.

Communicate clearly, concisely and effectively, both orally and in writing.

Understand and carry out oral and written instructions.

Use computer applications to assist in performing duties, e.g., word processing, spreadsheets, database and presentation applications.

Environmental Specialist II:

Apply procedures and techniques involved in the investigation, documentation, and enforcement of codes and regulations.

Properly interpret, and make decisions pertaining to laws, ordinances, regulations, and policies.

Apply procedures and practices for issuing notices of violation and schedules for compliance.

Analyze and evaluate technical and scientific data, and reach sound conclusions.

Analyze and evaluate situations and take appropriate action.

Photograph violations being investigated.

EXPERIENCE AND EDUCATION:

Environmental Specialist I:

Any combination of experience and education equivalent to a four-year degree in chemistry, biology, microbiology, environmental science, ecology, or sanitary engineering, or related experience which provides the knowledge, skills and abilities described above.

Environmental Specialist II:

An additional two years of experience at the Environmental Specialist I or comparable level which provides the knowledge, skills, and abilities described above.

SPECIAL REQUIREMENTS:

Possession of a California Class C Driver's License and evidence of a satisfactory driving record. May be required to work after hours and weekends.

Within the first year of employment, must complete coursework related to the authority to write citations equivalent to the CA Peace Officer Standard Training (POST) Penal Code 832 course.

PHYSICAL/MENTAL DEMANDS AND ENVIRONMENTAL SETTING:

While performing the duties of this class, an employee is regularly required to sit; talk or hear, in person and by telephone; use hands to finger, handle, feel or operate standard office equipment; and reach with hands and arms. An employee is frequently required to walk and stand. Specific vision abilities required by this job include close vision and the ability to adjust focus to read and operate office equipment as necessary during the course of the work assignments.

While performing the duties, employees of this class are regularly required to use written and oral communication skills; read and interpret data, information and documents; analyze and solve problems; use math and apply mathematical reasoning and abstract concepts; observe and interpret people and situations; learn and apply new information or skills; perform highly detailed work on multiple, concurrent tasks; work under intensive deadlines; and interact with staff, the public and others encountered in the course of work.

Incumbents will work in a variety of environmental settings, such as in the office, in and around storm water, wastewater, industrial wastes, and hazardous substances and in the immediate vicinity of laboratory chemicals and reactive agents used to analyze environmental samples. The specialists may on occasion have to lift up to 50 lbs. assisted or unassisted when picking up sampling equipment. Incumbents must also travel to a number of site locations within and outside of the city to meet with clients, staff and other agencies and inspect facilities.
